Projects

ApplyZen – AI-Assisted Resume Builder

React.js, Express.js, PostgreSQL, Tailwind CSS

- Built a resume builder featuring live A4 previews, ATS-conscious templates, resume import, and version history.
- Implemented job-description matching and evidence-based bullet rewrites to tailor resumes to job requirements.
- Developed an application tracker and offline mode using localStorage for browser-based persistence.

Talksy – Real-Time Chat Application

React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Cloudinary

- Developed a full-stack chat application supporting one-to-one messaging, online presence, read receipts, and image sharing.
- Implemented real-time communication using Socket.IO and JWT-based authentication with protected backend routes.
- Integrated Cloudinary for image uploads and built a responsive three-panel interface using React Context and Tailwind CSS.

ymusix – Terminal-Based Music Player — Published on npm

Node.js, JavaScript, React/Ink, SQLite, mpv IPC

- Developed and published an installable terminal-based music player as an npm package.
- Integrated mpv through JSON IPC for playback control and external media tools for music discovery and downloads.
- Implemented SQLite persistence for music metadata and playback-related state, alongside queue management and caching.

Achievements

- **Problem Solving:** Solved 1000+ Data Structures and Algorithms problems across coding platforms.
- **Open Source:** Published **ymusix** on npm, reaching 471 weekly downloads.
